

What is SMARTdoc™ ?

SMARTdoc™ is a suite of Document Management Solutions, scalable from a single user desktop utility, up to an enterprise wide framework, all based upon one simple user experience.

SMARTdoc™ is the most intuitive and easy-to-use Document Management solution. The tool is developed with user friendliness in mind. Many other systems require different sequential operations to successfully archive documents. In SMARTdoc™ a simple drag-and-drop operation will do the trick. Extract useful information from documents or enrich documents with useful information. The search module allows the user to quickly access documents no matter which version. A search based on one or multiple keywords, a part of a filename, a content fragment or the archive date are some of the possibilities.

SMARTdoc™ Pro

The professional version of SMARTdoc™ is intended for small businesses. SMARTdoc™ Pro has an extended feature set.

Some key features: Preview support for Microsoft™ Word and Excel documents • Automatic index fetching from Microsoft™ Word/Excel documents and image files, based on pre-defined templates • E-mail integration • Automatic index fetching based on calculations in pre-defined templates • Quality checks on automatically fetched indexes, based on pre-defined templates • Version control for documents • Reporting tool to save the results of your search • Export of the entire archive to one or more CD/DVD • + all basic features of SMARTdoc™ Desktop

€ 3333

€ 4032,93 (VAT incl.)

SMARTdoc™ Server

The server version of SMARTdoc™ is intended for small and medium businesses that want to use the software in a network environment. The simple user interface hides a powerful server application which contains all the necessary requirements a modern document management system should have. Many common file formats can be processed, indexed and stored in one central archive. SMARTdoc™ Pro is the minimum version which is required to connect to the server.

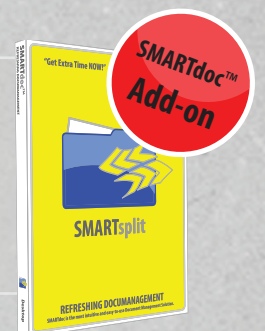

Some key features: Disclose, share, publish and secure your documents and information • One archive for all users • SMARTflow: Align SMARTdoc with your existing document- and workflows respecting, controlling and directing the requested timeframes • SMARTsecurity: User/group restrictions for your important documents and synchronize with directory services • + all basic features of SMARTdoc™ Pro
